

# HDD/DVD Media Player

HDD/DVD Media Player with PC/TV Media Disk

MP670

## Description

The INOi Media Player (MP670) is a bundling of HV670, HDD/DVD Media Player, and HD370, PC/TV Link Disk. As a standard DVD and DivX player, the Media Player supports all the standard optical formats such as CD-ROM, CD-R/RW, DVD-R/RW, and DVD+R/RW. However, when used with the HD370, an external USB 2.0 HDD Cassette, the Media Player really excels.

The MP670 eliminated the hassle of watching downloaded video only on a PC or having to burn to optical disc first. Before the introduction of the INOi MP670, if you want to download video from the internet, you only had limited choices for video playback. You could watch the downloaded contents on the small screen of your PC, or you could painstakingly wait to burn your desired video to a DVD disc and then play back using a DVD player.

With the INOi MP670, you just download the content to the HD370; unplug it, pop it in to the Media Player and you are ready to enjoy it. You save time and plenty of DVD disc. Of course, you can always burn the content to a DVD or CD if you decide to keep it later.

You can use the HD370, when connected to your PC via a standard high-speed USB 2.0 connection, to store media files from the internet or other sources. The high capacity 3.5" HDD inside supports plenty of storage space which allows you to capture ample contents of audio, video and photos for viewing directly with HV670 on your TV.

The DivX certified Media Player support DivX 3.11/4.x/5.x files and DivX VOD. You can navigate the contents on HD370 and DVD disk functions of the HV670 with an included remote control, all in the comfort of your sofa or reclined chair. The Media Player is backed by one-year limited warranty and toll-free technical support.
